

Removing the "established business relationship" qualification from the fax regulations is bad for business. Prior business and/or patient relationships should serve as prior consent to active communications. Further, numerous questions remain regarding what communications the FCC might consider "commercial" versus necessary doctor-patient or professional types of data exchange. Please do not intrude on our everyday lives and practices by removing this qualification!! Thank you for your attention in this matter.

Neil H. Hecht, D.P.M.
